

## TUDOR SATIN

### The elegance and style of Tudor

The Metrotile Tudor satin-finish tile exudes a traditional, European style reminiscent of the Tudors of a by-gone age. Its elegant and undulating form is well suited to both modern and traditional homes. Tudor is also available in a textured finish.

With Metrotile Tudor you can enjoy this look combined with all the benefits of steel, exceptional weather and fire resistance, and long life. Metrotile Tudor satin-finish tiles are available in a wide selection of colours to enhance any exterior colour scheme.

Extensive research and development in the design process ensures every Metrotile product is manufactured to the highest quality with exceptional durability and strength. The tile profiles and roofing accessories are engineered to interlock and overlap to resist wind lifting and keep out the harsh elements. At less than 5kg/m<sup>2</sup>, a Metrotile roof is a 'Lightweight Roofing System', so considerable cost savings can be achieved during construction. The perfect replacement for your old existing roof, a Metrotile roof lets you improve the look and value of your home in a matter of days.

All of Metrotile's roofing products are fabricated from Zinalume<sup>®</sup>-protected steel.

Metrotile's satin-finish enjoys added protection thanks to an acrylic topcoat that is up to two times thicker than colour-coated steel. This extremely durable UV-resistant coating enables Metrotile roofing products to withstand the harshest environments around the world. The satin-finish system uses only the best quality pigments to ensure excellent colour retention and corrosion resistance.

Metrotile is ISO 9001 accredited. International tests reports, appraisals and field results confirm our products are 100% waterproof, earthquake safe, fire resistant and able to withstand hurricane-force winds of up to 190kph (120mph). A Metrotile roof will not only safeguard your investment but will also give you complete peace of mind because it's backed by a Metrotile warranty.

You will not find a more durable, versatile and attractive roofing product on the world market that will surpass Metrotile's quality.

**Minimum roof pitch: 12.5 degrees**
